

The Following list the first 66 emails sent from individuals focusing on the following 3 principles (each email is listed on a separate page):

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Ann Hancock
P.O. Box 558

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Charity Kirk
5498 Bravo Toro Ln

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration. Thanks!

Sincerely,
Ai-Chu Wu
2019 Crimson Lane

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Jane Paneitz

Dear Market Advisory Committee,

I understand your committee is considering a cap-and-trade system as a tool for reducing global warming. Please do not devise a cap-and-trade system that gives polluters a free pass to continue polluting. We need bold action.

Any cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Jenny Bard

911 Carr Avenue

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Sue Spofford, Co-Chairman, Sustainable San Rafael

61 Dunfries Terrace,

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.*
- The carbon cap should cover all carbon entering the economy.*
- Companies should not be allowed to buy cheap offsets overseas.*

Please take these important principles into consideration.

Sincerely,

Ken and Elizabeth Sawyer

3533 Hillcrest Avenue

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invested in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Brad Larsen
2405 Rancho Cabeza Drive

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Adolph N. Hofmann

1128 Utah Court

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Paul Francis

Petaluma Neighborhood Association

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Mary Romes

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Sharon Ledbetter, Director of Global Friendly, P.O. Box 5485

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- **Polluters should pay to use the atmosphere with the revenues to be invested in a clean**

energy future.

- **The carbon cap should cover *all* carbon entering the economy.**

- **Companies should not be allowed to buy cheap offsets overseas.**

Please take these important principles into consideration.

Sincerely,

Donn L. Black

St. Helena, CA

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act, it is truly appreciated.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future, polluters, particularly GROSS polluters should HAVE to clean up their act, and be fined if they fail to do so!.
- The carbon cap should cover ***all*** carbon entering the economy.
- **Companies should not be allowed to buy cheap offsets overseas.**

Please take these important principles into consideration, they are critical to our survival!.

Sincerely,

Robin H. Berens 1495 Mount Weske Drive

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act. I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Dear Market Advisory Committee Members-

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.
- Please take these important principles into consideration.

I hope I can count on your support.

Regards,

John Almerico

Carbon banking is a formula that effects the planet - not just California. Even though we are the first state to step up to the Koyto Agremeent that will expire soon.

If a USA Company wants to purchase credits off shore that would fine. But how can the certification of the sink be reviewed. I think it would be foolish to try and put the money in the hands of the people. Let's save our planet first and reduce carbon output or we may not have a planet to save.

As you know I migitate wetlands and habitat and carbon banking will not be reality until it is law in California or the USA.

The cheapest way to bank is the best way to bank. So I am against forcing anyone to bank locally or refund money to the public.. that is greedy by the GREEN SIDE and I am as GREEN AS THE COME

Please send comments to the Market Advisory Committee - ideally by June 11!

Last year California passed the Global Warming Solutions Act, committing the state to reduce carbon dioxide emissions to 1990 levels by 2020. A Market Advisory Committee was formed to advise the state on how to implement the Act.

This is a critical opportunity for climate protection.

The Committee has recommended a ‘cap-and-trade’ program which raises several issues:

- Should valuable carbon permits be given *free* to fossil fuel companies, or should they be *sold* to the companies with the revenue used for the common good?
- If the permits are sold, should some of the revenue be recycled to California residents to offset higher fuel prices?
- Should California companies be allowed to buy cheap ‘offsets’ overseas instead of reducing emissions here?

The next opportunity for public comment is [June 12](#). We invite you to attend the public hearing at the Cal EPA Headquarters, 1001 I Street, Sacramento.

Copy and paste sample letter below and send to addresses provided below.

Sample letter

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I am a native Californian, born in San Francisco and have lived in San Rafael for the last 45 years. I am a mother of three sons and a Past President of the Environmental Forum of Marin and former Board Member of Marin Conservation League. I earned my B.A. and M.A. Degrees in biological science (1958, SFSCollege) and began a Ph.D. program in botany at University of California at Berkeley. I returned to U.C. Berkeley (1978) and completed my Ph.D. in environmental planning in 1987.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Katherine L.C. Cuneo, Ph.D, Retired environmental Planner, 7 Poco Paso

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely, Betsy Hall, Ph.D.

Betsy Hall, Ph.D.

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.

- The carbon cap should cover *all* carbon entering the economy.

Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Marilyn & Frederick Goode
2303 Grove Street

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

Regarding the proposed cap-and-trade system, I urge you to base it on the following principles:

- Polluters should pay for valuable carbon permits to use the atmosphere, and revenues should be used to invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Chris Cone

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,
Vincent L Whitcomb

Vince Whitcomb

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Susan Pringle-Cohan

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Dr. Robert Girling
Professor.
School of Business and Economics
Sonoma State University

Dear Market Advisory Committee,

As a longtime California resident and citizen concerned with the effects of global climate change, I appreciate your work in implementing California's Global Warming Solutions Act. California can set an example through its leadership in this critical worldwide issue.

The cap and trade system is the best way to go for all concerned and should include these points:

- It is only fair that polluters should pay to use the atmosphere, and those revenues subsequently raised should be used to compensate residents for higher energy prices and significant investment in a clean energy future.

- No carbon entering the economy should be excluded from the carbon cap.

- The idea of California companies purchasing cheap offsets overseas rather than reducing emissions at home defeats the purpose of the plan and should be prohibited.

I hope you will take the above important principles into consideration.

Sincerely,

Susan McWilliams

St. Helena Climate Protection Task Force

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act. I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,
Maya Craig

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

This is the most important opportunity of new technology application in California as well as the entire country. We demand that the California's investment and technology strategy be on renewable and economically sustainable energy technologies. If the leadership in Washington cannot recognize this critical need then California needs to take the initiative again. We as voters passed the stem cell research bond and I believe with a well crafted bond request to fund science and application of energy technologies that funds not only the science but requires that the manufacturing stay in state we can become the driving force to make the changes necessary.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future here in the US. This reflects the true cost of an item as opposed to passing off the the pollution (cost) to future generations or countries without strict environmental safeguards.
- The carbon cap should cover all carbon entering the economy. Note the opportunity of using aluminum in the energy cycle to produce hydrogen for fuel cell technology. Recent interview on "Science Friday" on NPR.
- Companies should not be allowed to buy cheap offsets overseas. This is an opportunity to continue polluting here.

Please implement these important principles now..

Sincerely,

Robert and Lindy Schmitt, Sonoma California.

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Sandra Ericson, Co-chair, St. Helena Climate Protection Task Force

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Nabeel Al-Shamma
14841 Chalk Hill Road

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Susan Silverman
5065 Rick Drive

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act. Your work is more important than ever given the great need for real reductions and resources to implement those reductions in a timely manner.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy. It must be a tight cap given the time it will take to implement to make up for all the carbon still being produced.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,
Tiffany Renée
842 B Street

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

We believe a cap-and-trade system must be based on the following principles:

We favor cap-and-auction.

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

We also encourage a Carbon Tax and Fuel Taxes.

Please take these important principles into consideration.

Sincerely,

***Veronica Jacobi, Santa Rosa Councilmember, and David Gougler, Rebecca Como of
239 W 8th, Santa Rosa California 95401***

and Stefanie Como of Berkeley CA

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and *revenues should be used to* invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Regards

Robert Seton

DC Power Systems

Technical Director

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act.

I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Kae McGuire

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act. I believe a cap-and-trade system must be based on the following principles:

- Polluters should pay to use the atmosphere, and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover *all* carbon entering the economy.
- Companies should not be allowed to buy cheap offsets overseas.

Please take these important principles into consideration.

Sincerely,

Liz Yager

4197 Sonoma Mountain Rd.

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act. I believe that a cap-and-trade system that is effective and serves all Californians must be based on the following principles:

- Polluters should pay to use the atmosphere and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy and for administrative efficiency be regulated "upstream."
- Companies should not be allowed to buy cheap offsets overseas.

I hope that you will incorporate these important principles into your final recommendation.

Sincerely,

Renata Brillinger
15290 Coleman Valley Rd.

Dear Market Advisory Committee,

Thank you for your work to help implement California's Global Warming Solutions Act. I believe that a cap-and-trade system that is effective and serves all Californians must be based on the following principles:

- Polluters should pay to use the atmosphere and revenues should be used to compensate residents for higher energy prices and invest in a clean energy future.
- The carbon cap should cover all carbon entering the economy and for administrative efficiency be regulated "upstream."
- Companies should not be allowed to buy cheap offsets overseas.
